C. S. HYMAN & CO.

BOOT AND SHOE DEPARTMENT

London, June, 1882.

We have much pleasure in again bringing to your notice our annual Fall Circular.

Owing to the increased demand for our own manufacture of Boots and Shoes, we have been forced to add several new machines to our already extensive Manufactory, and in consequence of this are enabled to keep pace with all demands of the trade

In men's, boys' and youths' Boots we are offering lines that cannot fail to meet your wishes, both as to price and quality. Every attention is being paid to the manufacture, and nothing but the best leather used. We, therefor can confidently guarantee that the standard of our work in these lines will not deteriorate.

Our samples are very complete in women's, misses' and children's lines, having been carefully selected as to quality, price, and value. The fact of importing our foreign stock direct for the requirements of our own manufactory, enables us to offer special inducements. We also offer full assortments in other lines, and invite inspection.

As usual, our buyers have visited the Eastern markets, and in doing so have taken advantage of prompt cash payments, purchasing the offerings of that market suitable to the trade, which we will lay before our customers at a small advance. We include in our assortment full lines of Trunks, Laces, Dressings, and other cottons. Law W Lewis

Our MR. ~~J. KIRKPATRICK~~ will call on you during present or coming month with a full assortment of samples. Your commands will have our prompt and careful attention
